Good morning! In response to your email, please see the attached files from CSRA regarding the remaining LOE for chemicals on the EFED schedule, as well as the "Weekly Status report." I have also attached a brief "EFED budget for Q3 and Q4" spreadsheet that (hopefully) breaks down the expected costs.

Let me know if you have questions or concerns. We can also do a conference call if needed. If you really need CSRA to stop working on the Q4 chemicals please let me know ASAP. For work done to date on those, we would still need to pay the invoices, but I would have to get final costs on those chemicals to date.

Thanks

Colleen

Colleen –

Here are estimates for all chems not delivered yet. Some have already been posted on the Weekly Status (into September). This is CSRA's internal version but it may make some of the numbers easier to figure out.

Let me know if anything else is needed.

Thank you.

Anne

Subject: Level of effort for EFED chemicals

Dale and I had a call with Anita Pease and other EFED folks yesterday. They remembered how we used to send documents like that which I have attached, as a way for them to know when a chemical is going to take longer than expected (or cost more than they budgeted).

Is this possible to do for any/all remaining chemicals they have listed on the Schedule? They would like a better handle on how much things are costing moneywise as they plan for next FY.

Thanks
